

“SKIN” In The News

by Northside Dermatology

Attention Ladies

It's that time of year again to get into those
“Itsy Bitsy Teeny Weeny Yellow Polka Dot Bikinis”
so come in and get waxed for the summer!!!!

Waxing can be used for removing hair from virtually any part of the body. It removes hair from the root so it takes longer for the hair to grow back depending on an individual's speed of hair growth. Waxing can last up to 8 weeks. This means your hair free and smoother for much longer leaving you worry free to go to the beach and your favorite vacation. Waxing leaves the skin soft, smooth and rejuvenated because it also removes a layer of dead cells from the surface of the skin. The hair that grows after waxing may return finer and softer. After repeated sessions, you may notice a sparser hair growth.

There are a few things that you need to know before you call to schedule your waxing session:

1. Please allow 10-14 days of growth or ¼ inch for waxing
2. Exfoliate lightly 24 hours before coming in, this helps to lift any potentially ingrown hairs.
3. Do not tan 24 hours before or after the appointment.
4. Please make us aware if you are using topical retinoids, Retin A, accutane, acne medications, or certain antibiotics before you schedule your appointment. Waxing during your menstrual cycle or during pregnancy may make you more sensitive. Please feel free to call our Esthetician Danette Waymire with any questions.

*Your skin is the largest organ in the body,
so why not protect it?*

The best way to protect your skin during the hot summer months is to wear sunscreen with an SPF of at least 30 that contains titanium and Zinc. More than 1 million cases of skin cancer are diagnosed in the United States every year. Fair-skinned individuals who sunburn easily are at particularly high risk for developing skin cancer. Other important risk factors include: tanning bed use, and family history of skin cancer.

Latisse®

Latisse is doing another great special for the month of June. When you buy a Latisse kit, you will receive a free Vivite Vibrance Decollete Therapy. Vivite is specially formulated to help improve the overall appearance of the skin on the chest area in just 8 weeks reducing the appearance for fine lines and wrinkles and sun damage.

What's New

Glytone has a new **antioxidant line** out that consists of a powerful anti-aging vitamin C serum, a time released glycolic free acid cream and an anti-aging eye cream that enhances skin tone and texture and promotes collagen production. Antioxidants are necessary for the daily prevention of premature aging and they serve as one of the most powerful and potent anti-aging ingredients, helping to protect and improve the skins from damage caused by free radicals.

For a limited time only, purchase the Glytone Antioxidant Line,
and receive a **free** Glytone Chemical Peel.
(a \$95.00 value)

We'd love to treat you!
